1964-1972 MP3-ME digital MP3 adapter For FM Radio
(Motorola plugs)

MP3-ME digital MP3 adapter (Motorola plugs), The high-quality, American-made MP3-ME FM allows you to enjoy music in digital STEREO sound from your 'smart' phone or other portable music source (including MP3, iPod, CD player, Satellite Radio, or any other device with a 3.5 mm (1/8 inch) headphone jack) without changing your existing radio and speakers. The MP3-ME's compact design makes it easy to hide behind the dashboard, preserving the appearance of your dash. The MP3-ME is optimized for ALL AM-FM tuners, either factory and aftermarket, either mono or stereo. The MP3-ME routes music from your portable media player directly into your car's factory radio (and automatically bypasses the antenna), so there is never any broadcast radio interference. MP3-ME installation is quick and simple: 1) "tee" the MP3-ME's coaxial cables between the radio's antenna socket and the vehicle's antenna cable, 2) connect to vehicle power at the fuse panel, and 3) connect to chassis ground. Tune your radio to 91.1 FM, plug the MP3-ME audio cable into your media player's headphone socket, set the media player's volume level to about 2/3 of full. Use the dashboard radio to adjust music volume and enjoy! DO NOT COMPARE THIS UNIT TO THE COUNTLESS PIECES OF CIGARETTE LIGHTER CHINA JUNK BEING SOLD ON EBAY! THEY SIMPLY DO NOT GIVE YOU A QUALITY SOUND THAT MATCHES YOUR OEM RADIO. This unit does not take up your cigarette lighter. It does not experience ANY interference from other radio stations. It does not fall apart after a week. You don't have to lose your ability to play CD's on your factory unit. It delivers digital quality sound! Always! It's made in the USA! This version of MP3-ME fits any vehicle with the classic motorola style radio antenna plug.

1964-1972 Rear Speaker Mounting Stud Spring Clip Set - 4
PC

This is the factory clip stud to mount the rear speaker on mesh package tray cars. It has a spring clip to keep tension on the stud. Slides into the package tray mounting hole and the speakers bolt up to it to mount the speaker in place. This is used on hardtop cars that have mesh style package trays where the speaker grill is part of the package tray. Fits 64-81 Chevelle / Camaro / Cutlass / Skylark / GTO / Impala / Nova

GTPPZ0475
